

OREGON FRONTIER INNOVATION HUB

The **Oregon Frontier Innovation Hub** helps rural entrepreneurs turn bold ideas into thriving businesses by connecting them with the right people, funding, and tools—right when they need it.

From **launching ag-tech startups** to scaling clean energy ventures, we coordinate **local expertise** and **statewide resources** to move businesses forward.

We work with companies rooted in **regional communities**—businesses delivering real goods and services to local people—and we open doors to collaboration, capital, and sustainable growth.

More Information

www.oregonfrontier.org

Backed by Business Oregon's 10-Year Innovation Plan, we're part of a statewide network accelerating high-growth, science- and tech-based companies with mentorship, talent development, and targeted support.

Our hub is led by the Rural Engagement & Vitality Center, Blue Mountain Community College, and Catalyst Public Policy Advisors - partners committed to building a stronger, more resilient Eastern Oregon economy.

How is the Hub different from other business support organizations?

Our service area spans a **region as large as Ohio**; we are part of the Oregon Innovation Council, a public-private partnership **supporting innovators from idea to market**.

Through partnerships across Eastern Oregon and beyond, we provide direct access to statewide resources. Our **hands-on, collaborative approach** allows us to co-create tailored resource packages aligned with **your unique business goals**.
